team

The world's **best-selling** floor heating brand™

Roof & Gutter De-Icing

Freeze and thaw cycles create ice dams that can quickly damage or even destroy roof coverings, gutters, and downspouts.

Snow Melting

Snow Melting systems prevent the buildup of snow and ice on driveways, sidewalks, loading ramps and other paved surfaces.

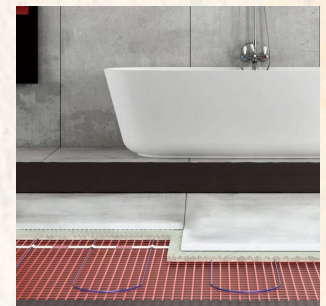

Pipe Trace

Maintain pipe temperatures in residential & commercial freeze protection, industrial viscosity maintenance and flow-control process applications

Floor Warming

Floor warming systems include electric systems and insulation systems which keep stone, ceramic and engineered wood flooring comfortable.

FEATURED PRODUCTS

Priority Wire PVC Thermostat Cable

PVC Thermostat Cable is primarily used for power limited circuits such as thermostats, air conditioning, heat pumps, bell and alarm systems, signals systems, door bells and remote control units where the voltage does not exceed 150 volts. Temperature rating is -20°C to +60°C.
